

High Performance, Versatile & Space-Efficient Optical Transmission

Maximize Performance
& Wavelength Capacity

ChromaFlex

Key features include:

- Highest Density, Modular Platform Available
- **NEW** Dual/Triple/Quad Direct Modulated Transmitters for Typical HFC Applications
- Chromadigm Chirp-free Transmitter Technology for Distance Independent Transmission of up to 40 Wavelengths/Fiber
- Optical Transmitters, Amplifiers, Receivers & Switches
- 2RU Chassis Supports Eight Single-width, Hot-swappable Modules
- All RF Interfaces are 1.2 GHz to Support DOCSIS 3.1
- Access to Chassis Locally with Handheld Display or Remotely via SNMP & Web GUI
- Applications with Node Segmentation / Hub Eliminations / Long Distance Applications / RFoG Service Segmentation / Distribution Networks / FTTx Networks
