I-HUB

Including

A NEW GENERATION OF

Forward & Return Path DWDM Solutions

The I-HUB optical hub platform is an ideal tool to minimize fiber requirements for the migration to Node+0, hub eliminations, node segmentations and RFoG, or reclaim existing fibers for additional broadband subscriber narrowcast services & revenue generating business services
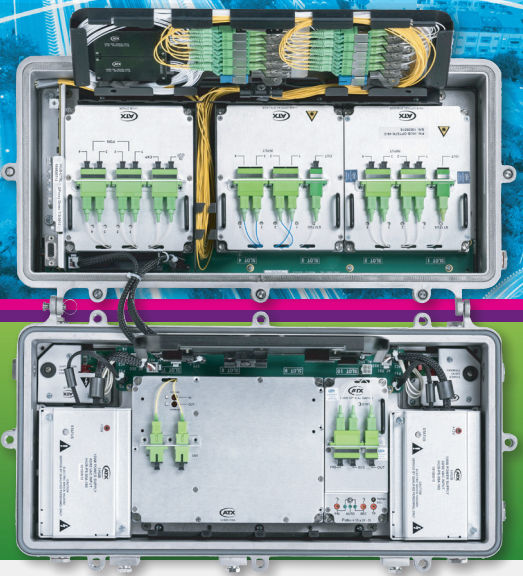

I-HUB

Applications Include:

- Optical Repeater
- Migration to Node+0
- Hub Elimination
- OBI-free RFoG Repeater
- Node Segmentation

Platform Modules:

- Optical Switch, EDFAs, OBI-free RFoG Repeater, Return Path Frequency, Stacking, Optical RX & TXs, Field-hardened Passives, RFoG Return Combiner

Features:

- Outdoor-hardened Housing
- Dual AC Power Entry Ports
- Redundant Power Supplies
- Remote Monitoring & Control
- Internal Fiber Management Trays
