

# Streamkeeper™

It is not a patch; It is armor

## Unmatched content security innovation for operations

Verimatrix Streamkeeper delivers studio-approved digital content security combined with military-grade app shielding plus advanced anti-piracy countermeasures to provide operators with a fast, easy, and effective way to hunt down and take out pirates who aim to steal content such as live sports and movies. It's the complete content security package that's consistently proactive, not just reactive.

Deliver premium content securely and rapidly without glitches.

Detect piracy threats and deploy countermeasures to curb the abuse.

Identify content leaks at distribution level and shut down illicit sources.

# 4 Steps to Fight Piracy

Verimatrix  
Multi-DRM

Verimatrix  
Counterspy™

Verimatrix  
Watermarking

## Step 1: Take control

Prevent usage of emulation scripts and enforce usage of original apps.

## Step 2: Protection

Protect all clients on iOS and Android HTML5 – initial protection.

## Step 3: Monitoring & Shutdown

Permanent Monitoring, controlled Shutdown.

## Step 4: Targeted Counter-measures

Device and App attestation, Watermarking and controlled Counter-measures.

RENEW PROTECTION

STREAMKEEPER SUITE

## Start with Streamkeeper Multi-DRM

Regulate access to your system with a future-proof architecture.

DRM is surely not enough to safeguard your content from being pirated. But without a smart and solid Multi-DRM, any content protection strategy is doomed to fail. Streamkeeper Multi-DRM is designed for efficiency, reliability, and performance. And of course, it is perfectly integrated with the Streamkeeper portfolio.

**Verimatrix Streamkeeper Multi-DRM is compatible with PlayReady, Widevine and FairPlay.**

**A DRM system that's built to address the needs of today's video streaming providers, as they need it:**

- Get up and running at SaaS speed
- Completely elastic and scalable
- Cost-effective, usage-based billing
- Feature rich content protection
- Cloud capabilities for on-premise Operators
- Deploy a globally redundant system
- Operate stable, robust and resilient services
